			Note: Astronomy 10 is designed for non-science majors; it has no prerequisite coursework. However, as it does fulfill the physical science requirement, students will be					

required to perform basic algebraic computations. Simple equations and scientific notation are a part of the course, although not extensively used. More important is learning the way that science works, and some scientific vocabulary. In return you get a full tour of the universe, and learn about the origins and evolution of its contents.
